

PRADNYESH S

AI Engineer & Full-Stack Developer

workspace.pradnyesh@gmail.com | Mumbai / Pune, India
github.com/25Pradnyesh | linkedin.com/in/pradnyesh-s
x.com/Pradnyesh_25 | cal.com/pradnyesh

SUMMARY

AI Engineer and Full-Stack Developer focused on building AI-powered products, high-performance web systems, and intelligent interfaces from zero to shipped. Experienced across LLM integrations, modern frontend/backend architectures, and Web3 protocols.

EDUCATION

B.E. - Electronics & Computer Engineering Savitribai Phule Pune University (SPPU)	2023 - 2027
B.K. Birla College of Arts, Science & Commerce 12th Grade	2021 - 2023
Smt. Kantaben Chandulal Gandhi English School 10th Grade	2020 - 2021

TECHNICAL SKILLS

AI & ML: Python | Generative AI | LLMs | Prompt Engineering | AI APIs | AI Agents
Frontend: React | Next.js | TypeScript | JavaScript | Tailwind CSS | Framer Motion | HTML5/CSS3
Backend & Cloud: Node.js | FastAPI | Supabase | RESTful APIs | System Architecture
Web3: Smart Contracts | Blockchain | Monad | Web3 Ecosystems | Decentralized Systems
Product & Design: Figma | UI/UX | Prototyping | Design Systems | Information Architecture
Tools: Git | GitHub | VS Code | Linux/Windows | Postman

EXPERIENCE

Software Development - Hands-on product engineering, system architecture, and shipping full-stack production systems.	~1-1.5 years
AI / GenAI Engineering - Building AI-powered prototypes, LLM-orchestrated workflows, FastAPI services, and contextual intelligence.	~1 year
Web Development - Engineering performant, responsive web apps using React, Next.js, Node.js, and TypeScript.	~1-1.5 years
Web3 Development - Developing smart contract interfaces, decentralized syndicate applications, and participating in ecosystem hackathons.	~6-12 months
UI/UX & Product Design - Designing clean, high-conversion interfaces, interactive prototypes, and design systems in Figma.	~1-1.5 years
Video & Media Production - Independent and agency video editing, visual storytelling, and digital content creation.	1+ year

FEATURED PROJECTS

- Travel AI | Next.js, Python, FastAPI, AI, Google Maps**
AI-powered travel location extraction system that processes Instagram travel content and organizes discovered locations directly into Google Maps.
- Penguin Protocol | Monad, Web3, Smart Contracts, AI Agents**
Decentralized AI Investment Syndicate built to automate and coordinate on-chain liquidity & AI-driven investment strategies. Winner - Monad Blitz Pune.
- Reclaim | Next.js 14, Tailwind, Supabase, Cerebras API, Llama**
AI-powered digital wellbeing and screen-time management application built and shipped in 6 days during the WeMakeDevs FutureStack GenAI Hackathon.
- VertiFarm | React, IoT, AI, Dashboard, UX**
Smart vertical farming management platform for monitoring environmental telemetry, sensors, critical alerts, and crop health metrics.
- Design Resource Vault | Next.js, Tailwind CSS, Framer Motion**
Visual-first platform for discovering, bookmarking, and organizing high-utility design resources and tools.

HONORS & AWARDS

- Winner - Monad Blitz Pune: Penguin Protocol - Decentralized AI Investment Syndicate
- Hackathon Finalist - WeMakeDevs FutureStack GenAI Hackathon: Reclaim - Built and shipped in 6 days using Cerebras API & Llama

Demo Day - Starknet Outpost: Web3 project demonstration and technical presentation

Startup Weekend - AIBoomi Pune: VoiceAds - AI voice advertising MVP prototype
